## Letter to the Editor

# Intravenous paracetamol infusion versus intramuscular tramadol as an intra-partum labor analgesic

Sir,

We read with interest the article “Intravenous paracetamol infusion versus intramuscular tramadol as an intra-partum labor analgesic” by Mohan H et al published in November - December 2015, volume 4 issue 6 of International Journal of Reproduction, Contraception, Obstetrics and Gynecology.<sup>1</sup> As we read it, we realized that the article is quite similar to another article “Intravenous paracetamol infusion versus intramuscular tramadol as an intra-partum labor analgesic” by Lallar M et al.<sup>2</sup> Although the authors quote this article as their reference, the degree of similarity between the two articles is beyond our acceptance. Hence we would like to bring it to your notice. We know that any original research should be encouraged to be published, but the authenticity in style of writing the same should be maintained and plagiarism to such a high extent is not acceptable.
